Dear J.P.,

People in Centerville strongly support the reclamation of the hill especially going east looking from the top of Center Street. Right now we look at mine waste, dug up terrain, a deteriorating road and piles of contaminated hills. We would like to see it changed to look like the already reclaimed areas in front of the Mt Con Mine .

Reclamation doesn't benefit just Centerville but improves the site for everyone especially for visitors, potential residents, possible new businesses, people who enjoy the walking paths.

Esthetics is very important for a city. What reclamation that has been performed has been a positive asset for Butte and we would like to see that continued.
